MEMORANDUM FOR: Chief, Exploratory Development Laboratory
Branch

SUBJECT: Fabrication of 70mm Film Spool Spacers -
#997184

STAT The recently delivered reversal processor RT 12-R makes use of a [] film spool magazine which provides a feed for one spool of 70mm film among others. It is desired to provide feed for two 70mm film spools to increase the capacity of the machine.

STAT It is requested that spacers be made to fit the shaft furnished [] and as explained to him.
